SUMMARY

Third-year B.Tech Information Technology student with hands-on experience in full-stack development and AI/ML through academic and hackathon projects. Skilled in Java, Python, React.js, Node.js, Express.js, REST APIs, and SQL. Experienced in building web applications, integrating databases, and developing machine learning solutions. Strong problem-solving, teamwork, and leadership skills, with an interest in building practical software solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++,C
Frontend Development: Javascript, HTML5, CSS3, React.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, RESTful APIs, JSON, JWT Authentication
Databases: MySQL, SQLite, SQLAlchemy, Database Design, SQL Queries, MongoDB
AI/ML : Scikit-learn, Random Forest, Anomaly Detection, Data Preprocessing
Developer Tools & Platforms: Git, GitHub, VS Code, Vercel, npm, Render

PROJECTS

SkyGuard AI – AI-Based Anomaly Detection Platform | Python, FastAPI, React.js | *Live Demo* | *GitHub*

- Developed a machine learning platform to identify anomalies, assess sensor health, and prioritize maintenance requirements.
- Implemented missing-data imputation and integrated analytical results into an interactive dashboard**.**

NIRVANA – AI Cognitive Gaming Platform | Python, scikit-learn, FastAPI | *Github*

- Developed adaptive difficulty prediction and cognitive performance analysis modules using 1,000 synthetic game-session records.
- Trained a Random Forest classifier that achieved 99.5% test accuracy for difficulty prediction.

Event Management System | React.js, Node.js, Express.js, MySQL | *Live Demo* | *GitHub*

- Built a full-stack web application featuring user authentication, event booking, and an administrative dashboard.
- Developed REST APIs and integrated MySQL to store and manage event information.

JanSetu AI – Governance Intelligence Platform | React.js, FastAPI, SQLAlchemy, | *Live Demo* | *Github*

- Built a governance dashboard featuring beneficiary coverage analysis, anomaly detection, and geographic gap identification.
- Implemented data analysis modules to identify regional service gaps and generate actionable recommendations.

CARE360 – Healthcare Platform | React.js, Vite, Python | *Live Demo* | *GitHub*

- Developed a healthcare web platform with a dedicated login interface.
- Implemented application modules for patient monitoring and backend data processing..

BYTEBREAK – Cybersecurity Gaming Platform | React.js, Vite, JavaScript | *Live Demo* | *GitHub*

- Developed a browser game with five interactive coding, memory, and debugging missions.
- Implemented timers, scoring, lives, streaks, sound effects, and local storage.

LEADERSHIP & ACHIEVEMENTS

- **Team Leader – NIRVANA:** Led a six-member team during the Smart India Hackathon internal hackathon, coordinating task allocation, technical integration, and project submission.
- **Sports Coordinator:** Coordinated sports activities, supported event organization, and facilitated team participation.

CERTIFICATIONS

Python Full Stack Development | Core Java Programming | SQL | Hackathon Participation Certificates

EDUCATION

Dr. D. Y. Patil College of Engineering, Akurdi, Pune
B.Tech in Information Technology | Expected 2028 | CGPA: **8.67**
